**GEWA**  
STRINGS

"As much as you care about your instrument – we do too.  
Wherever your musical journey takes you and your  
GEWA case, what matters is reliance."

# GEWA Cases

Founded in 1925, in the town of Adorf in the Vogtland region of Germany, as a case and bag manufacturer, GEWA music is much more than that today. Nevertheless, manufacturing cases for high-class bowed string instruments lies in the company's DNA and is a passion ever since.

The renowned and award-winning GEWA cases are developed with the greatest care and effort. It is not only a goal but a premise; innovative materials in timeless designs, equipped with functional, patented features, make them outstanding and the most reliable companions for daily life and travel, as well as storage of instruments and their accessories.

# HISTORY

## of Production

Dedication is what drives GEWA music to constantly create new developments that become standards and has resulted in numerous patents registered in the field of cases. These include the famous Jaeger shape, the swivel bow holder, the flexible bow bridge, the neck support system, the padded suspension system, as well as the notable durability of the cases, a careful selection of resources is picked from the very best vendors found in Japan, Germany, Switzerland, Austria, Italy, Poland and the UK. By means of modern technology, prototypes are designed and put through paces before pilot series are eventually tested and refined by experienced musicians. Production will not start until the smallest details of a

product and its features are approved. Depending on requirements and materials, this will either be in company facilities in Asia or in a craft process in the Adorf workshops.

# GEWA

MADE IN GERMANY

The top series of Jaeger, Idea, Air and Strato are developed and manufactured from scratch in-house in Adorf and run under the exclusive brand GEWA Made in Germany. This brand requires the maximum level of craftsmanship and stands for handmade products, created by workers with decades of experience, at the company's site in Germany. A modern production, according to the latest standards, meets traditional craftsmanship in case manufacturing, which is the best of both worlds.

# GEWA

GERMAN ENGINEERED

Concepts and ideas of the brand GEWA German Engineered are completely developed in Adorf and manufactured in cooperation with partner and company-owned production facilities in Asia. With highest standards (GEWA Responsibility) these productions for cases enable to guarantee a reasonable price at a consistently high production quality.

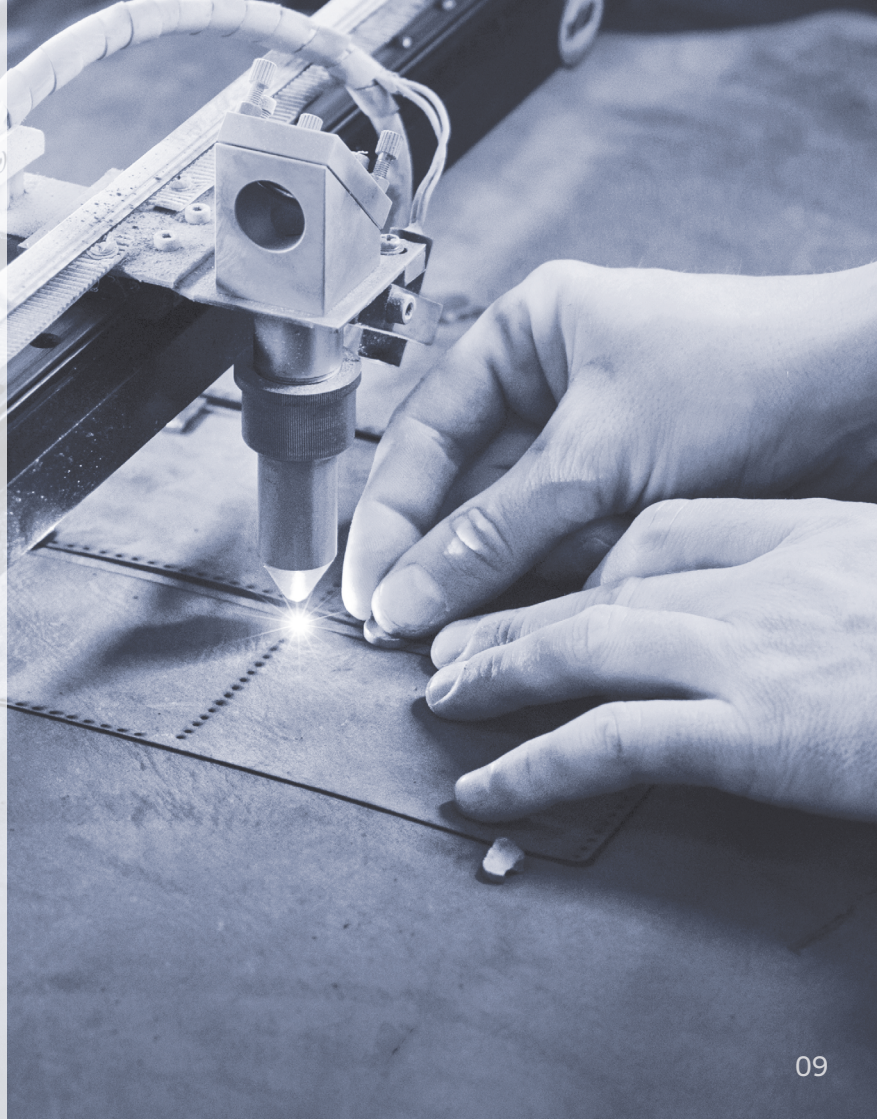

# PURE

---

GEWA

PURE GEWA manufactures cases under the series Polycarbonate, which stands also for its elaborate shell technology. PURE GEWA is based on GEWA Made in Germany, as well as GEWA German Engineered, however it is aimed to work best for beginners and the amateur sector and therefore provide a very affordable price point. Focusing on stability and practicality, the cases renounce rich details and upscale features.

# GEWA Cases Protecting World's Most Valuable Instruments

## **Kirill Troussov**

Supported and guided by Sir Yehudi Menuhin at a young age, Kirill Troussov is now widely recognized as one of the leading violinists of our time, working with renowned orchestras as well as performing prestigious festivals. He plays the infamous Stradivarius "Brodsky" from 1702, on which violinist Adolph Brodsky performed the world premiere of Tchaikovsky's violin concerto on December 4th, 1881 and protects it with a GEWA Air Prestige case.

## **Ray Chen**

Former student of Curtis Institute of Music and winner of the Queen Elizabeth and Menuhin Competition, Ray Chen, is one of the most exciting young violinists. Playing with youthful freshness and lightness on a "Joachim" Stradivarius from 1715, he is known for breaking boundaries between classical music and the modern genre and has also helped to develop the limited edition GEWA Air "World Case", in which he carries his valuable instrument.

## **Esther Abrami**

Growing up in the age of Internet and social media, Esther Abrami has succeeded on international stages and secured a coveted recording contract with a major label due to her determination and the willingness to share ups and downs of her life as a musician with a wide online audience. In 2019, she became the first classical musician to be nominated in the Social Media Superstar category at The Global Awards. Her fine Jean-Baptiste Vuillaume violin is stowed in a GEWA Air Avantgarde case.

# ARTISTS

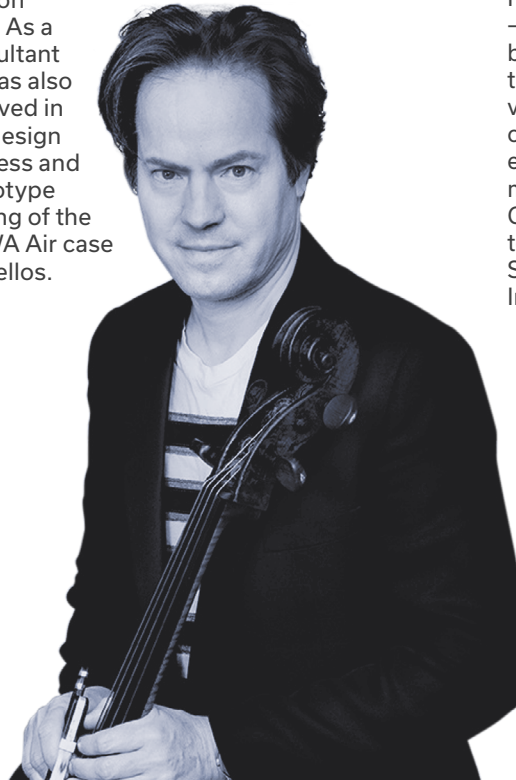

## **Nigel Kennedy**

With remarkable musical talent and sparkling energy Nigel Kennedy brought new impulses to the classical and contemporary repertoire, what earned him the name "enfant terrible" of classic music. He's one of the most in demand and progressive violin players of his generation and carries his priceless instruments in a GEWA Strato De Luxe case.

## **Jan Vogler**

A strong classical foundation allowed Jan Vogler to push the boundaries of sound, creating an ongoing dialogue with contemporary composers and performers. As a successful solo artist, he plays the Stradivarius El Castelbarco/Frau` 1707 Cello, which he stores in a GEWA Idea Carbon case. As a consultant he was also involved in the design process and prototype testing of the GEWA Air case for cellos.

## **Frank Peter Zimmermann**

Performing with the world's most outstanding orchestras as New York Philharmonics, Boston Symphony Orchestra, Orchestre National de France – to only name a few – Frank Peter Zimmermann belongs to the inner circle of the most distinguished violin virtuosos of the time. The extraordinary musician uses a GEWA Jaeger case to carry his infamous Stradivarius "Lady Inchiquin" from 1711.

# SHELL TECHNOLOGIES

## RATING LEGEND:

Stability: Rates the strenght to withstand or endure warping/torsion.

Weight: Rates the lightness of the case.

Insulation: Rates the time of the inside to adapt to the outside temperature.

Resistance: Rates the protection to impacts.

## THERMOSHELL

Highest possible stability, medium weight, outstanding thermal insulation, high puncture and impact resistance.

## POLYFOAM

High stability, ultra-low weight, outstanding thermal insulation, medium puncture and impact resistance.

## BIO

Medium stability, very low weight, medium thermal insulation, medium puncture and impact resistance.

### FIBERGLASS

Very high stability, medium weight, medium thermal insulation, excellent puncture and impact resistance.

### TITANIUM

Very high stability, extreme-low weight, medium thermal insulation, extreme puncture and impact resistance.

### CARBON

Highest possible stability, lowest achievable weight, medium thermal insulation, excellent puncture and impact resistance.

### ARAMID

High stability, lowest achievable weight, medium thermal insulation, extreme puncture and impact resistance.

### AIR

Highest possible stability, ultra-low weight, outstanding thermal insulation, extreme puncture and impact resistance.

### POLYCARBONATE

Highest possible stability, very low weight, outstanding thermal insulation, extreme puncture and impact resistance.

# SERIES JAEGER

Legendary quality since 1925

Hand selected materials and German master craftsmanship give this case it's incomparable appearance and make it almost indestructible.

The most experienced craftsmen hand-make the Jaeger series in Adorf, Germany. The humidors amongst the GEWA cases are designed for much more than just the storage of instruments; their appearance alone is a statement of solidity and culture. At the same time, they provide optimum protection for precious instruments.

## SERIES

# IDEA

**Form follows function**

Designed in 2007, the Idea concept bridges the gap between traditional manufacturing and new production technology in case-making.

The GEWA Idea series functions as a bodyguard for the instrument and has quickly developed into a favourite for musicians. A straightforward approach of 'form follows function' has proven to be the recipe for success. Its simplified and modern shapes express a new generation of high-class cases, while the practical interior design can be adjusted to the individual instrument and its player.

Idea cases are available in three respectively four different shell technologies, which determine the level of protection and weight.

## SERIES

# AIR

Masterpiece of engineering

The GEWA Air series incorporates the best ideas and innovations from decades of case manufacturing; each case is a masterpiece of engineering and at the same time, a fine design object.

The aim was to combine the thermal insulation of Jaeger and Strato shells with the plasticity and low mass of fiber materials. After years of development, this approach successfully produced what is now called "Air" technology.

This true milestone in case manufacturing is offered in a wide variety of colors and materials to give the option to adapt cases to any needs.

SERIES

STRATO

The reliable protector

The most efficient of the GEWA cases. Ultra-lightweight, sturdy and reliable under any conditions, the Strato series is suitable for working and traveling musicians as orchestra players, tutors and teachers.

The wooden frame, reinforced polyfoam shell is combined with selected features and rigid, premium materials.

# SERIES

# LIUTERIA

## The mediterranean comfort case

The GEWA Liuteria series covers a wide range of quality and comfort requirements. From the favorable Concerto basic models to the fine Venezia version, it's suitable from beginners up to more advanced users.

The cases' insulating and stable shells are manufactured on the basis of thermoshell technology. To top that off, they receive various first-class finishes, linings and water-repellent covers, depending on the requirements and price-level.

# SERIES SPACE

Comfort, Safety & Design

The GEWA Space series combines comfort, safety and an exciting modern design in one product. Based on polycarbonate technology, the robust shells provide instruments and accessories with the best protection and stability.

# SERIES

# BIO

Sustainable and natural

Sustainability is a crucial aspect in all areas of life. While raw materials become scarcer, the cause of waste must be reduced.

The GEWA Bio series is intended to give a way out of the constant cycle of raw material scarcity and littering. The stable shells of this series are made of naturally renewable flax fibers, which are particularly light, provide excellent insulation against temperature fluctuations and offer best protection to the instrument.

# SERIES

# ASPIRANTE

A students first violin case

The first instrument – the first case.

The GEWA Aspirante series offers secure protection in a lightweight and sturdy polyfoam shell with high quality features that cover all the needs of students' everyday life, at a great price point.

Without losing sight of quality and valence, the series provides an entry-level price point.

# SERIES

# POLYCARBONATE

Affordable design

The GEWA Polycarbonate series is suitable for beginners and amateurs. These cases offer a very good price-performance ratio by renouncing rich details and upscale features while still offering high stability, very low weight, good thermal insulation, puncture and impact resistance due to their shell technology.

# CASES FOR VIOLIN OR VIOLA

# JAEGER

## Model

### Jaeger Prestige

Only the best will do for the Jaeger Prestige cases. A most careful selection of fabrics, processed along with premium fittings, precision hardware and the highest standards in shell technology result in an almost indestructible case. The incomparable dedication to detail makes it a statement – whoever transports their instrument in it is immediately recognized as a serious musician.

With exclusive leathers, high-quality fabrics and features, Jaeger prestige cases are customizable inside and out.

# IDEA

## Model

### Idea Aramid

The Idea Aramid case uses fibers as woven sheets, which gives it some remarkable properties. Utilized in bulletproof vests, this material offers unmatched impact and puncture protection at a surprisingly low weight. In fact, there is no better combination concerning weight and impact protection to date. With its eye-catching surface and structure, it manages to express individuality and character like no other string bow case.

Stability	★★★★★
Weight	★★★★★
Insulation	★★★★★
Resistance	★★★★★

Besides the standard Idea features, such as German precision locks and air-sealed rubber channels on the lid and bottom edges to ensure minimum air exposure, the minimalistic interior offers space for four bows, one velcro removable accessory pocket, two movable velcro accessory holders for shoulder rests or belongings, a string tube and a silk sheet to cover the instrument.

Removable neoprene backpack straps and a detachable outside music sheet pouch guarantee easy and safe transportation, while the padded suspension system stabilizes the instrument's neck and scroll in midair.

# IDEA

## Model

### Idea Carbon

The Idea Carbon case is extremely light weight while offering maximum protection to the instrument. Focus during development was to combine the outstanding design with low weight, stability, impact resistance and thermal insulation.

The used carbon fiber weave sheets come from race car technologies, where requirements for low mass and strength are highest.

Stability ★★★★★

### Air Ergo

The Air Ergo case is proof of how advanced the Air series process is. With its more than exceptional shape, it is perfect for urban users who have to deal with all kinds of narrow environments. Almost unbreakable (due to its specially designed thermoplastic shell) and equipped with the best insulation properties, it also offers a high level of comfort and can be worn in a variety of ways:

- Held horizontally or upright by its handles
- Carried over the shoulder
- Carried on the back

2 detachable Neoprene rucksack straps for comfortable carrying

The case's selected exterior features include a combination lock, an outside music sheet pouch, removable neoprene backpack straps and very sturdy handles. Inside is a protective cover, the GEWA swivel bow holder, flexible bow bridges for two bows, a digital hygrometer and a humidifier, the padded suspension system and a removable accessory pocket.

**International proprietary right – developed in cooperation with Rainer Wilke.**

# AIR

## Model

### Air Luthier

The Air Luthier case was developed in direct cooperation with luthiers and is available exclusively from them. All details have been carefully discussed, thought through and designed with experts. The outcome is a case model that is optimally tailored to the needs of musicians.

Stability	★★★★★
Weight	★★★★☆
Insulation	★★★★★
Resistance	★★★★★

Modern design, combined with the pleasant feel of a soft touch surface, results in an excellence that does justice to the fine instruments that it carries. First-class features, such as the mechanically adjustable neck pad for violins and violas, the GEWA swivel bow holder, the flexible bow bridge, the padded suspension system, removable neoprene backpack straps and a high-quality carrying handle made of perforated leather, make this product outstanding.

# AIR The classic model

Stability ★★★★★  
Weight ★★★★★  
Insulation ★★★★★  
Resistance ★★★★★

The GEWA Air case is made with the proprietary GEWA Air shell technology, which guarantees an enormously high breaking strength, as shocks are absorbed by slight deformation. In addition to this stability, the special manufacturing process provides highly effective insulation against temperature fluctuations and weather. Due to the materials used, the cases are enormously light, despite their resistance.

It comes with selected outside features that include a combination lock, an outer music sheet pouch, removable neoprene backpack straps and very sturdy handles. This quality is continued inside with a protective cover, the GEWA swivel bow holder, the flexible bow bridge, the padded suspension system and a removable accessory pocket.

All colors are available in both shapes

# STRATO

Bow case for violin 350.831

# MATRIX

## Model

### Matrix

The Matrix bow case offers ideal conditions to transport, store and present bows of musicians, bow makers, retailers and luthiers.

The sturdy but lightweight aluminum case comes in sizes for 6, 12 or 24 bows.

# MAESTRO

## Model

### Maestro

The Maestro bow case has a classic wooden construction and is characterized by features such as reinforced corners, gold-colored snap locks and a high-quality finish, inside and out. This handy case is ideal for anyone who needs to transport or store bows independently of the instrument.

It comes in sizes for one or two violin bows, for one or two cello bows, for one German or one French bass bow and for two bass bows.

A partial view of a person's face on the left side of the image, wearing a headset with a microphone. The person's skin is light-colored, and the headset is black. The background is white.

# ACCESSORIES

# VIOLIN & VIOLA COVERS

## **Silk Bag for Violin**

The viscose silk bag provides additional protection to violins inside their cases.
